

Camwear® GripLid® GN 1/6 Size

Reduce Spills and Seal in Freshness!

**NOW
AVAILABLE in
GN 1/6 Size**

CAMBRO
MANUFACTURING COMPANY

DURABILITY THAT MAKES A DIFFERENCE®

GripLid® Reduces Spills

Now Available in GN 1/6 Size!

Simplify food storage and transport with Cambro's exclusive GripLid. The molded-in polyurethane gasket on the lid grips the side of the food pan, reducing food and liquid spillage. The self-enclosed container reduces points of cross-contamination, an important HACCP consideration. Spill-resistance eliminates the need for wrapping pans with messy aluminum foil or plastic wrap which costs 20¢ per each pan wrapped. This translates into lower labor and supply costs with the GripLid paying off in only 80 operating days. Also, food pans with GripLids stack easily when stored, improving space utilization.

- The lid is made out of virtually unbreakable Camwear® polycarbonate and is clear to easily identify contents. Available in GN 1/1, 1/2, 1/3 and 1/6 size to fit Camwear polycarbonate food pans.
- Designed to handle temperatures ranging from -40°F to +210°F (-40°C to +99°C). Ideal for holding and transporting hot or cold foods, including sauces, soups or other liquids.
- For use in refrigerators, freezers and insulated containers, including the Camtherm™ Cart. Not recommended on a steam table or in an oven or microwave.
- Corner lift for easy removal from food pan.
- Dishwasher safe. Stackable.
- Made of FDA approved materials.

Prep and store make table ingredients and food bar items in Camwear Food Pans covered with GripLids to enhance freshness.

Load food pan with GripLid covers into Camcarts®. Food and liquids won't spill during transport.

Pans with GripLids can be carried easier and with more confidence.

Camwear® Food Pans

Store, transport, display and serve food with Camwear food pans. Non-stick surface increases yield and is easy to clean.

Ultra Pan Carriers® and Camcarts®

Retain food temperatures while transporting complete meal service to any location. Polyethylene construction with polyurethane foam insulation to maintain food temperatures for hours without an electrical heat source.

StoreSafe® Food Rotation Label

100% dissolvable and 100% biodegradable labels help to manage a first in, first out (FIFO) approach of inventory usage.
