

## NOTE

To avoid leakage, make sure the jam nut is properly tightened against the inside of the thin washer. Test before use, tighten as needed from the inside of the reservoir. (refer to the image of the spigot)

## USE

1. Remove reservoir (B) from stainless steel base (A).
2. Fill stainless steel base (A) with ice leaving room to insert reservoir (B).
3. Before use check to ensure that the spigot (E) is in down position as shown in image. Fill reservoir (B) to the fill line printed on back with your choice of beverage.
4. **Infuser option:** Fill stainless steel infuser (C) with slices of fruit (orange, lime, lemon etc.), cover with lid (D) and insert into reservoir (B).  
or  
**Ice core option:** Place stainless steel ice core (F) inside infuser (C), fill ice core with ice, cover with lid (D) and insert into reservoir (B).
5. Lift handle up on spigot (E) to dispense. Release handle downward to its original position to stop dispensing.

## CARE AND CLEANING

1. Hand wash reservoir, lid and ice core in hot water with soft sponge or cloth using a mild, non-abrasive cleanser.
2. Rinse with hot water. Ensure that the spigot is open to flush and rinse water through for cleaning.
3. Hand wipe with non-abrasive, soft cloth.
4. Close spigot after cleaning is complete.

## TIPS TO PREVENT LEAKAGE

1. Thread faucet into reservoir up to its last turn and stop at 9 O'clock.
2. Hold the faucet in place while tightening the jam nut from the inside of the reservoir as tight as possible.
3. Once the jam nut is tightened hold it in place then turn the faucet head to 12 O'clock. By holding the jam nut while turning the faucet will give you better leverage.
4. Faucet should be tightly fastened in place.
